Experience

Waggoner Financial — Lansing, MI
Software Engineer — *Jun 2024 – Present*

- **Technical Leadership**: Led 4-engineer team through Agile ceremonies; designed full-stack monorepo (TypeScript · NestJS · GraphQL · Next.js · PostgreSQL · Redis) & bootstrapped 5+ projects.
- **Infrastructure & CI/CD**: Provisioned cloud infra on Railway, cutting environment spin-up from days to hours; built GitHub Actions pipelines for lint → test → build → Docker publish → zero-downtime deploy.
- **Quality & Performance**: Maintained 2500+ Jest tests at 95 % coverage, reducing production bugs 70 %; introduced query indexing, Redis caching, & React code-splitting—halving page loads.
- **Data Migration**: Automated legacy Excel workflows via REST/GraphQL APIs & ETL scripts, saving 100+ staff-hours monthly.
- **External Representation**: Presented at technical clubs on university campuses & appeared on engineering podcast discussing full-stack development.
- **Team Building & Stakeholder Impact**: Interviewed & hired engineers, growing team from 1 to 4; delivered bi-weekly client demos, architecture specs, & tech roadmaps.

Brass Raven — Reed City, MI
Co-founder — *Oct 2022 – Jan 2025*

- **Product Development**: Co-founded Audioparrot audiobook platform; architected Python Flask microservices & frontend (Next.js), improving generation speed 500 % via RabbitMQ async processing & Redis caching.
- **Business Development**: Met with 20 prospects & technology partnership through direct sales & conference networking; built reusable component library.

State of Michigan – DNR — Lansing, MI
Student Software Developer — *May 2023 – Jun 2024*

- **Full-Stack Development**: Built Angular/.NET production application serving 500+ monthly users; designed SSIS packages & SQL scripts to automate legacy data migration.
- **Process Improvement**: Coordinated team-client meetings & created CI/CD pipelines eliminating manual builds.

Education

Michigan State University
Bachelor of Science in Computer Science; GPA: 3.8

Projects

Dispatch — https://dispatch.foo
Agent Harness — *2026 – Present*

- **AI-Tooling**: Built Agent harness using Tauri. Think Linear, but local and agent focused.

Loggit — https://useloggit.app
Media Discovery iOS App — *2026 – Present*

- **iOS Application**: Built an iOS app with currently 80 users for managing your watched movies, tv shows, games, and books. Built a rec algo to show users adjacient media, i.e. "You liked x book, you would like y movie."

QueryDB — github.com/wsoule/Query
Tauri desktop application — *2025*

- **Desktop Application**: Built Tauri/Rust database client with sub-1s startup, environment switching, keychain integration, in-app Git collaboration, ERD generation, query library, & inline editing for 1M+ rows.

Technical Skills

Languages: TypeScript, JavaScript, Go, Python, SQL (PostgreSQL, MySQL), C#, HTML/CSS

Frameworks: React, Next.js, React Native, Angular, SvelteKit, NestJS, Express, Flask, .NET Core

Infrastructure: Railway, Docker, Kubernetes, CI/CD (GitHub Actions), AWS, GraphQL, REST, Redis, RabbitMQ

Tools: Git, Bun, Jest, Storybook, Agile/Scrum, TDD, Technical Documentation
