EXPERIENCE

Waggoner Financial

Software Engineer

Lansing, MI

Jun 2024 – Present

- **Technical & Team Leadership:** Spearheaded a 4-engineer squad; owned all Agile ceremonies—planning, backlog groom, daily stand-ups, retros—boosting sprint velocity by 30 %.
- **Enterprise Architecture:** Designed & documented full-stack monorepo (TypeScript · NestJS · GraphQL · Next.js · PostgreSQL · Redis) & mobile app (React Native) with modular domain boundaries & reusable shared libs.
- **Infrastructure Foundation:** Bootstrapped entire tech infrastructure from scratch; established 5+ projects (internal tools & external client applications), defined architecture standards, & created deployment workflows for new greenfield company.
- **Cloud Infrastructure:** Provisioned infra from a single VM to Railway; cutting environment spin-up time from days to hours.
- **CI/CD Automation:** Built GitHub Actions pipelines for lint → test → build → Docker publish → zero-downtime deploy; integrated automatic DB migrations & Canary rollbacks.
- **Quality Engineering:** Built comprehensive testing strategy with 250+ Jest tests maintaining 95 % coverage, reducing production bugs by 70 %.
- **Performance Optimization:** Introduced query indexing, Redis caching, & React code-splitting—halving page loads & trimming peak DB latency 65 %.
- **Data Migration:** Automated legacy Excel workflows through REST/GraphQL APIs & ETL scripts, saving 100+ staff-hours monthly.
- **Stakeholder Engagement:** Delivered bi-weekly client demos, wrote architecture diagrams/API specs, & presented tech roadmaps at company town-halls to align with business goals.
- **Technical Recruiting:** Interviewed & hired engineering candidates; evaluated technical skills through coding assessments & system design discussions, contributing to team growth from 1 to 4 engineers.
- **External Representation:** Represented company at industry talks & appeared on technical podcast; communicated technical capabilities & company vision to external audiences.
- **Mentorship & Continuous Learning:** Onboarded 4 engineers through pair programming & technical mentorship, fostering culture of continuous learning.

Brass Raven

Co-founder

Reed City, MI

Oct 2022 – Present

- **Product Development:** Co-founded Audioparrot audiobook platform; architected Python Flask microservices (NLP, TTS) & frontend (Next.js/NestJS → Angular/.NET), improving generation speed 500 % via RabbitMQ async processing & Redis caching.
- **Business Development:** Secured 20 clients & technology partnership through direct sales & conference networking; researched tech stack & built reusable component library.

State of Michigan – Department of Natural Resources

Student Software Developer

Lansing, MI

May 2023 – Jun 2024

- **Full-Stack Development:** Built Angular/.NET production application serving 500+ monthly users; designed SSIS packages & SQL scripts to automate legacy data migration.
- **Process Improvement:** Coordinated team-client meetings & created CI/CD pipelines eliminating manual builds.

EDUCATION

Michigan State University

Bachelor of Science in Computer Science; GPA: 3.8

East Lansing, MI

Oct 2021 – Dec 2025

PROJECTS

Railway Deployment Doctor

CLI tool for Railway platform users

Open Source

2024 – Present

- **Developer Tooling:** Built Bun/TypeScript CLI that scans projects before Railway deployment to identify common configuration issues (PORT binding, host configs, framework problems) and provides actionable fixes for Express, Next.js, Django, and others.

Dotfiles Management System

Go-based CLI & infrastructure

Open Source

2024

- **Tooling & Infrastructure:** Architected complete dotfiles management solution with Go CLI, Go API backend, TypeScript web interface; published via Homebrew tap.

BitTorrent Client

Go implementation

Personal Project

2024

- **Systems Programming:** Implemented BitTorrent protocol in Go, demonstrating peer-to-peer systems, concurrency patterns, and network programming.

Audioparrot Platform Infrastructure

Production audiobook generation system

Brass Raven

2022 – 2024

- **Distributed Systems:** Architected microservices architecture with Python Flask services, RabbitMQ message queuing, Redis caching layer, & web portal; processed audiobook generation requests at scale with fault tolerance & retry logic.

Personal Infrastructure

Self-hosted tooling & automation

Open Source

2024

- **DevOps & Automation:** Built personal infrastructure automation in Go; deployed self-hosted services, monitoring, & CI/CD pipelines for side projects.

LEADERSHIP & ACTIVITIES

Technical Speaker

Public speaking & knowledge sharing

Industry Events

2024

- **Community Engagement:** Presented at technical conferences & appeared on engineering podcast to discuss full-stack development, infrastructure automation, & startup engineering practices.

Open Source Contributions

Developer tooling & infrastructure projects

GitHub

2022 – Present

- **Community Tools:** Published open-source CLI tools via Homebrew; maintained projects focused on developer experience & infrastructure automation with active community engagement.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Go, Python, SQL (PostgreSQL, MySQL), C#, HTML/CSS

Frontend Frameworks: React, Next.js, React Native, Angular, SvelteKit

Backend Frameworks: NestJS, Node.js, Express, Flask, .NET Core

APIs & Data: GraphQL, REST APIs, WebSockets, PostgreSQL, Redis, MongoDB, RabbitMQ

Infrastructure & DevOps: Railway, Docker, Kubernetes, CI/CD (GitHub Actions), AWS (EC2, RDS)

Tools & Practices: Git, Bun, Jest, Storybook, Agile/Scrum, TDD, Code Review, Technical Documentation
